HERALDS OF SPRING

The finding in bloom of the "First Flowers of Spring" is a great event and one of the genuine delights of life. No garden, however small, should be without the showy Chionodoxas, charming Scillas, lovely Snowdrops, dainty Grape Hyacinths and cheery Crocus. Do not miss this opportunity of delight—plant as many bulbs as space permits. They take very little room, and once planted they reappear and bloom each spring.

CROCUS

For showy displays, Crocus should always be planted in groups or masses. They will grow in many places—in the lawn, in flower beds, in rock-gardens, in sun or shade, and even under trees. The flowers of the following named varieties of Crocus are large and strong and remain erect until the end of the flowering season.
